OPTIMIZE YOUR **CRYPTO** ASSETS

PARTNER OF

CooperateAsset is supported by leading institutions and individuals with experience across tech, crypto, investment management, and financial services

ABOUT COOPERATE ASSET

COOPERATE ASSET is a leading global financial technology-enabled liquidity provider in financial products, historically specialized in Exchange Traded Products (ETPs), now expanding into other asset classes. We are able to grow our organization further, thereby ensuring that our trading desks in Europe, the Americas, and Asia provide liquidity across all major exchanges, globally, 24 hours a day.

CooperateAsset removes the barriers to entry of investing in the cryptocurrency market — allowing everyone to be part of this financial revolution. We provide investment solutions that show sustainable gains in a safe environment. Focused only on investing in technology, that leverages capital, and actively guides them into global valuable assets. Our managers are constantly working on implementing unique trading methods with the most advanced and effective trading technology, competitive services, high-quality performance, genuine practices, and excellent customer support service that allow us to work successfully on the market in a profitable way.

We make it simple to add a diversified blockchain investment to complement existing traditional investments. Select from our various pre-specified portfolios and get started with your next investment.

"Bitcoins are the world's most used Cryptocurrency and an alternative way to grow worth online, with a total marketcap of over \$150 billion. CooperateAsset has been a revolutionary party of the Investment ecosystem. It is how a crypto investment infrastructure should work. Our platform gives

you the power to get the most profit out of the crypto industry with a seamless, safe, and secure environment. CooperateAsset is a managed Bitcoin trading platform built to help users invest in Bitcoin with ease and earn stable interest rates. CooperateAsset provides a single interface into all major crypto exchanges, a complete suite of sophisticated trading algorithms, real-time and historical P&L, exposure tracking, and professional customer service."

Thomas Bachmann
CTO

WHAT WE DO?

We are a technology company operating in the financial ecosystem, using our proprietary technology platform to quote bids and ask prices in thousands of financial products. We also provide liquidity in financial products, historically with a focus on exchange-traded products (ETPs). We do this globally; enabling investors to buy and sell ETPs efficiently by quoting bid and ask prices under virtually all market circumstances. In recent years, we have commenced the diversification of our market-making activities into other asset classes, such as Foreign Exchange (FX).

Supported by our proprietary technology platform, we provide liquidity in financial products that help contribute to more efficient markets by lowering overall trading costs, delivering greater execution quality, and market transparency. Moreover, providing liquidity allows investors to continue to buy or sell ETPs or other financial instruments even during periods of heightened market volatility. By continuously providing liquidity we make sure that markets continue to function in an orderly manner. In effect, we act as a stabilizing mechanism that helps to absorb market shocks.

As a liquidity provider, we help maintain and improve the overall transparency and efficiency of the ecosystem, by quoting bids and ask prices for financial products like ETPs, FX, and other products on trading venues, as well as off-exchange to institutional investors, which market participants can trade against. By providing liquidity we make it easier for investors to buy and sell financial products at a price that should reflect the (relation with the) current price of the underlying asset, and contribute to lower trading costs.

We provide this liquidity via two main routes: “on-screen” which is conducted on stock exchanges where CooperateAsset is a registered market maker in ETPs and “off-exchange” where we trade bilaterally with institutional counterparties, often through Request for Quote (RFQ) platforms.

Another role we play in the ETP landscape is as an Authorized Participant (AP). We have AP agreements in place with all the major ETP issuers. These agreements link the primary and the secondary ETP market and allow us to either create or redeem the ETPs and optimize our role as a leading liquidity provider in ETPs.

A BLOCKCHAIN AND CRYPTO WORLD

Blockchain technology can no longer be ignored in our society. Now that private adoption is widespread, institutional adoption is on the brink. The best-known protagonist of the expression of this technology is digital currencies or 'crypto assets, partly due to their immense popularity and growth. These digital assets will not just replace our analog version of money, but our analog version of the value.

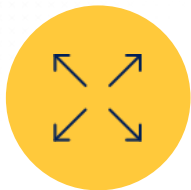

We specialize in understanding this technology and applying a sustainable investment strategy in this highly dynamic and volatile sector. With tailored portfolios, optimized by algorithms and a live real-time view, you can optimize your crypto assets. Work smarter. Not harder. Start today.

COOPERATE ASSET HIGHLIGHTS

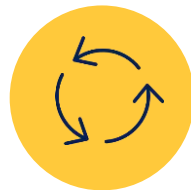

Fast

CooperateAsset offers unwavering performance with our world-class matching engine, supporting over 1,900,000 orders per second. We ensure fast and reliable crypto trading, even at peak times.

Scalable Infrastructure

Invest in a wide variety of cryptocurrencies on one single platform rather than multiple exchanges. Track your profits on one consolidated dashboard.

Reporting

Track profits and performance and view detailed transaction reporting from your consolidated dashboard

Protection by Insurance

Cryptocurrency stored on our servers is covered by our insurance policy.

ADVANCED INVESTING: EASY AS 1-2

There are 5000+ digital assets in circulation and new types are added every day. There are hundreds of exchanges, each with its own offer, safety requirements, and verification methods. The landscape of technology, crypto, exchanges, and wallets requires a deep knowledge of the underlying similarities and differences. CooperateAsset is in possession of this knowledge and features, does not require any from the users, and talks with you to see what offers the best solution for you. We make investing easy for users and highly advanced at the backend. Investing via CooperateAsset gives many advantages and outperforms the market while doing it.

HOW IT WORKS?

CooperateAsset is a completely managed platform with a user-friendly interface.

To get started you will need to Sign Up for an account, add funds into your account and activate your preferred plan.
